

ULTIMAX

Manhole cover D400

EN124-2 by	heavy traffic	round frame	hinged	elastomer seal	locking	elastic bar	OPTION

DESCRIPTION

Hinged lockable manhole cover D400.

ADVANTAGE PRODUCT

Efficient articulation

- Opening of the cover at > 110° for easy access and for the safety of the operators.
- Cover is removable at a 90°.
- Self-cleaning articulation at the time of opening.

Silence and stability

- EPDM joint clipped in the frame on the zone of support of cover.
- Manhole comprising alignment tabs in the frame.
- Antiskid design for low noise nuisance.

Implementation and use

- Round base frame.
- 2 handling rings on the base of frame.
- Indication of the optimal traffic direction.
- Reinforced frame, particularly rigid, with a base of frame little perforated, provide a large supporting surface for an effective sealing.
- 4 holes on the base of frame for a possible pegging.
- Locking by double elastic bar by simple pressure on the cover or vehicle passage.
- Release through leverage by any traditional tools.

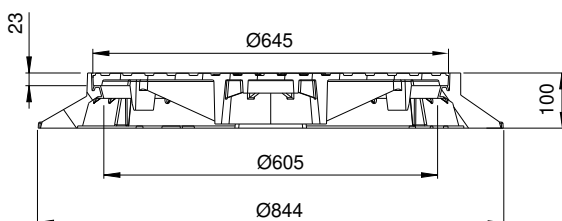

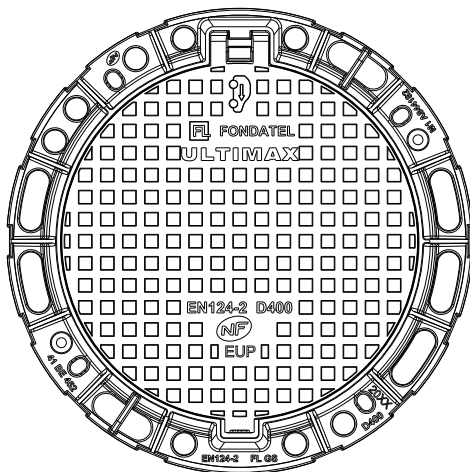

MATERIAL

Ductile iron GJS 500-7 depending on EN1563

PLACE OF INSTALLATION

Group 4, class D400 → see EN124-1

Carrageways of roads (including pedestrian streets), hand shoulders and parking areas, for all types of road vehicles
